

Stage 1 Judging Guide

Use this guide while reviewing PIDEDEC 1.0 Stage 1 proposal submissions. Scores are sent to admin for review and final representative confirmation.

PIDEDEC 1.0

Judges score submissions only. Representative selection is handled by admin after review. Criterion comments and overall comments are optional.

Purpose of Stage 1

Stage 1 is a selection stage. Each department will be represented in Stage 2 by one team.

The goal is to identify the strongest proposal from each department based on clear thinking, sound engineering logic, and alignment with the PIDEDEC theme.

Judge Responsibility

Review assigned submissions independently and enter the official weighted rubric score for each proposal.

Judges do not pick representative teams on the portal. Scores and optional feedback go to admin, and admin confirms the department representatives.

Comments and Feedback

Criterion comments are optional.

Overall comments are optional.

When provided, comments should be concise, constructive, and focused on the proposal rather than the people who wrote it.

Confidentiality and Conduct

Review submissions independently and declare any conflict of interest.

Keep scores, rankings, and deliberations confidential until official results are published.

Report any attempt by a team to lobby, influence, or improperly contact you.

Stage 1 Scoring Rubric

CRITERION	POINTS	WHAT TO LOOK FOR
Problem Statement Clarity	20	The proposal clearly defines the problem, who is affected, why it matters, and what happens if it remains unsolved.
Proposed Solution Quality	30	The proposed engineering solution is strong, technically grounded, appropriate to the problem, original, and valuable.
Theme Alignment	20	The proposal clearly connects to Engineering for Impact: Building Inclusive Solutions for a Sustainable Future.
Feasibility Assessment	20	The solution can realistically be built, simulated, prototyped, or implemented within the stated constraints.
Departmental Relevance	10	The proposal meaningfully applies engineering principles from the team department.
